## Introduction

Add your content here.

The screenshot displays the Openbiz Cubi Platform interface, specifically the Backup Management section. The top navigation bar includes 'Administration' and 'Collab'. The left sidebar lists various system components, with 'Backup' and 'Manage Backup' highlighted. The main content area shows a 'Backup Management' section with a description: 'Database backup management could help you backup or restore your system database with simply one click. It could prevent your data lost by any mistake.' Below this, there are buttons for 'Backup', 'Restore', 'Download', 'Upload', and 'Delete', along with a 'Cubi Storage' dropdown menu. A table lists backup files with columns for 'Icon', 'Filename', 'Filesize', and 'Update Time'. The table contains six entries, including 'New\_Backup\_Default\_2011-12-14\_04-06.tar.gz' and 'New\_Backup\_Default.sql'. At the bottom, there is a 'Go to Page' and 'Show Rows' section, and a footer with 'Privacy Statement', 'Terms of Use', 'Trademarks', 'Contact Us', and 'Copyright 2003-2010 Openbiz LLC All Rights Reserved.'.
