Cubi Project Management Application

Featured

Updated Mar 16, 2014 by [rockys...@gmail.com](#)

Introduction

Cubi Project is an open source project management application released under GPL V3 license.

Installation

Download the source from SVN. <https://openbiz-cubi.googlecode.com/svn/trunk/apps/project>

As Project is a Cubi application, you can copy the project folder into cubi/modules/. The load Project into Cubi platform with command

```
# cd cubi/bin/tool/  
# php load_module.php project
```

Launch Cubi in your browser, you should see a new tab called "Project" in the application tab area. Click "Project" tab to start exploring Project application.
