

## CubiEmailModule

Phase-Implementation

Updated Jun 30, 2011 by [rockys...@gmail.com](#)

## Cubi Email Module

As all know, email delivery is not very reliable in current internet due to many reasons. The goal of Cubi email module is to send email more efficiently and manage in and out emails.

### Email queue

Cubi use a queue to store unsent emails. Emails in queue will be sent by cronjob or from Email queue page. On the Manage Email Queue page, user can pick emails to send or delete.

Cubi System > Administration > Email > Manage Email Queue
admin <admin@yourcompany.com>

### Application Menu

- Users
- Roles
- Modules
- Menu
- Email**
  - Manage Email Queue
  - Manage Email Log
- Help
- Event Logs

### Manage Email Queue

Manage application email queue. All emails are added into the email queue before sending out

	Sender	Recipient	Subject	Status	Processed Time
<input type="checkbox"/>	System Notification	abc	Reset Your Password	pending	
<input type="checkbox"/>	System Notification	abc	Welcome New User	sent	2010-05-31 13:12:02

### Email log

Emails are sent by User Email Service that generates a log entry in email log table. Administer can view the email log at Manage Email Log page.

Cubi System > Administration > Email > Manage Email Log
admin <admin@yourcompany.com>

### Application Menu

- Users
- Roles
- Modules
- Menu
- Email**
  - Manage Email Queue
  - Manage Email Log
- Help
- Event Logs

### Manage Email Log

Manage application email logs. Email logs record email activities.

Timestamp	Sender	Recipient	Subject	Result
2010-05-31 13:12:01	System Notification	abc	Welcome New User	A connection attempt failed because the connected party did not properly respond after a period of time, or established connection failed because connected host has failed to respond.
