Cubi User module

Cubi user module provides the functions for end users to

- Register
- Login
- Forget and reset password

User login page

Login page is the default page that user will see after the successful installation.

New user self registration

For a new user, he/she can click "Register new account" link to register.

User Register

Username	<input type="text"/>	* between 3-10 letters or numbers
Password	<input type="password"/>	* between 4-20 any characters
Password Repeat	<input type="password"/>	* Input password again for confirmation
Email	<input type="text"/>	
<input type="button" value="Register"/> <input type="button" value="Back"/>		

After user is registered successfully, the user will be taken to a successful registration page (see screen below) and a welcome email will be sent to user email address. The welcome email is defined in email module at /cubi/modules/email/template/welcome_email.tpl.

Forget Password

In case a user forgets his/her password, he/she can click the "Forget password?" link on the login page to reset the password.

Forget password

Don't worry if you just forgot your password.
Please fill in following form and we will send you an email with a link
which you can reset your password by clicking the link.

Username	<input type="text"/>
Email Address	<input type="text"/>
<input type="button" value="Send Email"/> <input type="button" value="Back"/>	

After user click "Send Email" button, a "Password Email Sent" page will be displayed.

Password Email Sent

An email has been sent to you
which you can reset your password by clicking the click on the email.

If you have not received the email ,
please try to look at it in your spam email box.
if it is still not found it your may try to submit the form again to resend it.
