

CubiOAuthTwitterSetting

New Cubi Oauth Twitter Setting

Updated Mar 13, 2014 by [rockys...@gmail.com](#)

Guide of how to setting Twitter OAuth on Cubi ¶

Despite i had made a wiki page about how to setting Google OAuth on Cubi.

But every manufacture like Google or Facebook or Twitter all have different OAuth setting and apply process.

So for let all the others avoid wasting time to figure out how to set up the Twitter OAuth on Cubi i made this wiki page.

Step1: Open Twitter OAuth window under Extension Module

Here we can get Twitter oauth apply URL and Callback URL

Role

Group

OpenBiz

OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should

Access level	Read, write, and direct messages About the application permission model
Consumer key	*****
Consumer secret	*****
Request token URL	https://api.twitter.com/oauth/request_token
Authorize URL	https://api.twitter.com/oauth/authorize
Access token URL	https://api.twitter.com/oauth/access_token

General

Platform

twitter

twitter

Website

<https://dev.twitter.com/>

App Key

App Secret

Status

Callback

Callback URL

http://local.openbiz.me/ws.php/oauth/callback/callbacktype_twitter/

Step2: Log in your own twitter account

[Home](#)

Sign in with your Twitter account

Please log in to access that page.

Username: *

New to Twitter? [Sign up](#)

Password: *

[Log in](#)

Step3: Go to My applications

Step4: Create a new application

Step5: Input Application names, surf URL and Callback URL

Create an application

Application Details

Name: *

jack-lee

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

Description: *

cubi twitter oauth

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

Website: *

http://local.openbiz.me

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens.
(If you don't have a URL yet, just put a placeholder here but remember to change it later.)

Callback URL:

http://local.openbiz.me/ws.php/oauth/callback/callback/type_twitter/

Where should we return after successfully authenticating? For [@Anywhere](#) applications, only the domain specified in the callback will be used. [OAuth 1.0a](#) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

Step6: Now we get Key and Secret

[Home](#) → [My applications](#)

jack-lee

cubi twitter oauth

<http://local.openbiz.me>

Organization

Information about the organization or company associated with your application. This information is optional.

Organization	None
--------------	------

Organization website	None
----------------------	------

OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should never be human-readable in your application.

Access level	Read-only
--------------	-----------

[About the application permission model](#)

Consumer key	06c83j4MB1...VHj1kIA
--------------	----------------------

Consumer secret	zD8G8...HeS1avXPgbw
-----------------	---------------------

Request token URL	https://api.twitter.com/oauth/request_token
-------------------	---

Authorize URL	https://api.twitter.com/oauth/authorize
---------------	---

Access token URL	https://api.twitter.com/oauth/access_token
------------------	---

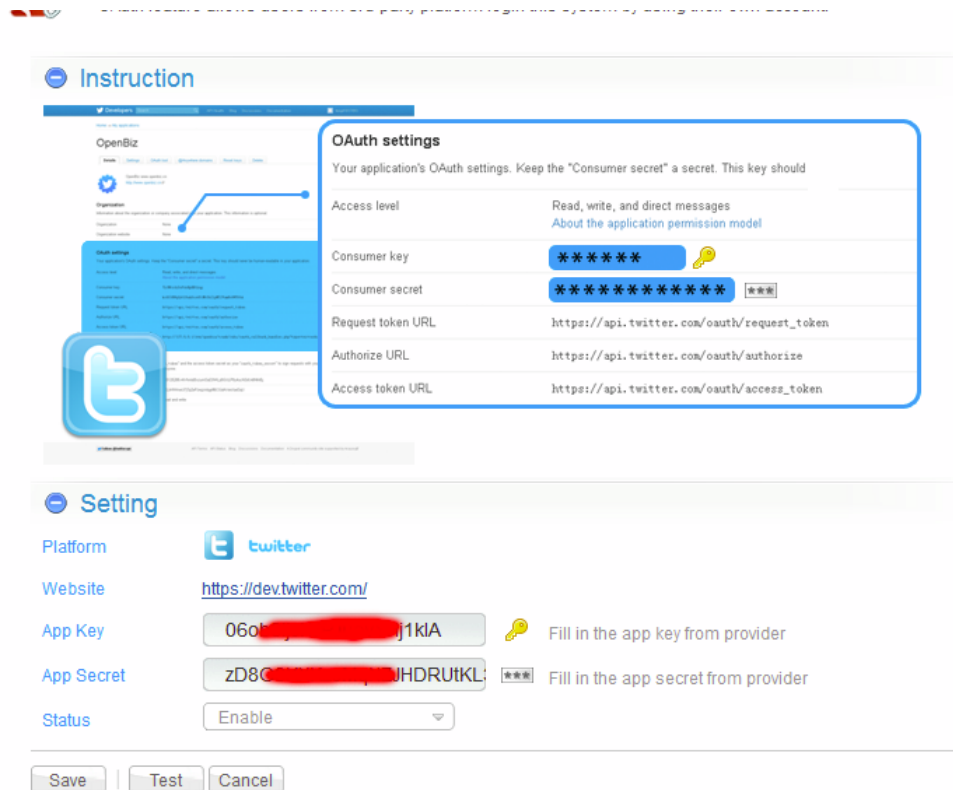

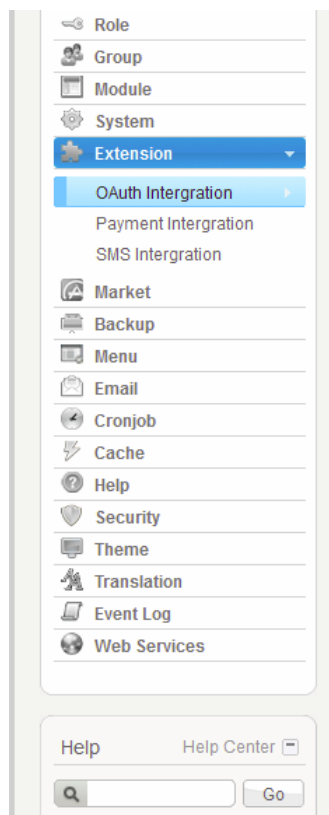

Callback URL	http://local.openbiz.me/ws.php/oauth/callback/callback/type_twitter/
--------------	---

Your access token

It looks like you haven't authorized this application for your own Twitter account yet. For your convenience, we give you the opportunity to create your OAuth access token here, so you can start signing your requests right away. The access token generated will reflect your application's current permission level.
