Example of Paypal on Cubi Payment Intergration

Nowadays there are lots of time we need payment function for our website or online business applications.

And more and more clients ask developer to build the payment function for their online business applications.

So the good news is we have made a new payment module into the latest Cubi Platform now.

Here is a simple example that how to setting an payment account in Cubi.

step1: Let's open payment intergration window and click edit button

Platform	Status	Account	Priority	Action
支付宝	Off		55	Edit
PayPal 宝贝	Off		50	Edit
PayPal	Off		50	Edit
网银在线	Off		50	Edit

step2: Here we input the account

that will be used for receiving money and enable it

Platform: PayPal

Website: <http://www.paypal.com/>

Account: * Fill in the account name

Status:

step3: Here we can see all the setting done

and callback URL
